

Kasna Insights from Data (KID)

Fixed Price GCP Data Analytics Platform

What is it?

Kasna Insights from Data (KID) is a fixed cost, fixed effort engagement to migrate your existing analytics assets and pipelines to an out of the box, production ready, best practice data analytics platform on Google Cloud.

Why?

Kasna has created a fixed price offering to help customers create a data warehouse in Google Cloud. KID allows businesses to gain new, actionable insights by consolidating data from a number of internal data repositories, into a productionisable and secure landing zone in Google Cloud. The fixed price and outcome nature of the offering means a customer gets a secure, best practice data warehouse established in the cloud at a known cost up front.

Features

- ✔ Modelled data ready for consumption for BI, reporting and other applications
- ✔ Data lake and warehouse
- ✔ Sensitive/PI data management built in
- ✔ Scalable managed service and serverless technologies. Low infrastructure management.
- ✔ Secure by design
- ✔ IaC to automate deployment of new environments.
- ✔ Assessment, migration and ETL build for existing datasets

Optional Add Ons

- ⊕ Uplifting or migrating an existing data platform to GCP (e.g. Hadoop to Cloud, Cloud based Oracle Data Warehouse)
- ⊕ GCP consumption costs (quoted separately)
- ⊕ Managed Environment costs (quoted separately)
- ⊕ Post migration support (quoted separately)

Kasna Insights from Data (KID)

Fixed Price GCP Data Analytics Platform

Plan Sizing

Sizing	Data Sources	Delivery Sprints	Price Guide
Small	1-2	4	\$108,000
Medium	3	6	\$147,000
Large	4	8	\$190,200

Options

BI Pack (dashboard design and build in Data Studio or Looker - 5 days) \$7,500

Prices exc. GST.

Prices are a guide only. Final pricing dependent on size of data sources, number of tables and complexity of business cases and will be determined after workshop.

How does it work?

Kasna executes a four-step process to transition a fixed set of data sources to the KID data platform. Each of these steps has tasks which ensure the most secure and efficient transition to Google Cloud.

1. Assess

Identify data sources.
Use case analysis.

2. Plan

Data migration & transformation planning.

3. Ingest Data

Stand up data platform.
Data ingestion.
Data transformations

4. Optimise

Data consumption setup.
Testing
ETL pipeline optimisation.

Kasna Insights from Data (KID)

Fixed Price GCP Data Analytics Platform

Who's it for?

KID is Ideal for Businesses needing a fixed budget to start returning business value from data. Customers can either be new to Google Cloud and looking to take a test-drive of Analytics from BigData with zero upfront commitment, or already on Google Cloud, keen to break into data-driven analytics.

Why Kasna?

Kasna can work in either self organised or blended teams primarily focussed on delivering business value. Rather than work to a rigid set of instructions, our team applies their expertise in working flexibly with our customers to understand their business and deliver the best outcome. Something unique that Kasna brings to the table are their skills in business design. These individuals are dedicated to ensuring dashboards and visualisations provide strategic value, and are easy to understand and use for their intended audience.

Kasna is Australia's premier Google solutions only partner, covering all Google products from the cloud to the end-user device – Kasna lives and breathes Google.
